

AEROSIGHT

Intelligent Surveillance System VTOL UAV

AEROSIGHT is Unmanned Aerial Vehicle with Vertical Take-Off and Landing (VTOL) capability designed for efficient surveillance, reconnaissance, and data collection across various terrains and operational conditions. This system combines high-maneuverability drone technology and high-precision surveillance sensors such as **electro-optical/infrared (EO/IR) cameras** and **real-time data transmission systems**.

Main Features

- PRACTICAL & PORTABLE
- ANYWHERE, ANYTIME FLIGHT
- EXTENDED FLIGHT ENDURANCE

- ADVANCED SURVEILLANCE CAPABILITY
- SMART LANDING SYSTEM
- REAL-TIME ENEMY POSITION REPORTING

TECHNICAL SPECIFICATION

Physical

Wingspan	2400 mm
Length	1100 mm
Height	300 mm
Typical all-up-weight	8 kg

Performance

Speed range	70-90 km/hr
Operation range	± 20 km
Endurance	± 40 minutes
